

Region F Healthcare Preparedness Coalition

Established: 08/2012

Region F Healthcare Preparedness Coalition

The first kickoff meeting of the Region F Healthcare Preparedness Coalition was held on October 24, 2012

You are invited to participate!

What is the Region F Healthcare Preparedness Coalition?

Region F (based on GHA Regional Coordinating Hospitals) includes the following counties:

Bibb	Henry	Lamar	Pike
Butts	Houston	Monroe	Spaulding
Crawford	Jones	Peach	Upson

Region F hospitals have been meeting together since 2007 with the goal of becoming better prepared to respond to disasters. The hospitals have developed strong relationships and have plans to support each other during emergencies.

Recognizing that hospitals alone are not sufficient to take care of the health care needs after a disaster, the Region F Healthcare Preparedness Coalition will include all healthcare organizations including but not limited to;

- Hospitals
- Community Health Centers
- Emergency Management Agency (EMA)
- Emergency Medical Services (EMS)
- Nursing Homes
- Public Health
- Home Health
- Mental/Behavioral Health Providers
- Dialysis Centers
- Pharmacies

As the lead agency for planning, emergency management will be a key member of the coalition. The Region F Healthcare Preparedness Coalition will become a dynamic collaborative planning network.

Why is the Region F Healthcare Preparedness Coalition important?

When a disaster hits a community or a region, the entire health care system will be impacted and will have to respond. All health care organizations, from the largest hospital to a small community health center, will need to work together in a coordinated fashion to effectively respond to the disaster and work towards recovery. Planning together saves lives!

Health care organizations make plans for their own facilities. Hospitals have planned with other hospitals. Nursing homes have planned with other nursing homes. During all healthcare emergencies, decisions made by one health care organization will impact others. Healthcare organizations planning together will create a more prepared and resilient healthcare system.

What are the benefits of membership in the Region F Healthcare Preparedness Coalition?

As a member, your organization will build new and stronger relationships with other healthcare organizations and emergency management; learn about available resources in the community; have your concerns heard and addressed in the planning process; and have access to training and grant funding.

One objective of the Region F Healthcare Preparedness Coalition is the development of a coordinated emergency response plan. By planning collaboratively, all members of the coalition will be strengthened and will be better prepared. Your organization will learn from the experiences of others. By participating in the coalition, your organization may be able to meet some of your requirements related to emergency plans and exercises.

How can my organization join the Region F Healthcare Preparedness Coalition?

All health care organizations in Region F are invited to join the coalition. Members regularly attend meetings, participate in planning, and agree to work with and support other members during disaster response and recovery.

How can I learn more about the Region F Healthcare Preparedness Coalition?

The next meeting will be on January 16, 2013 from 9 am to 1 pm at Houston Medical Center. For more information, contact:
