

NCHD Community Health Improvement Plan (CHIP) 2015

Priorities

Goals

Objectives

Chronic Disease – Focus on Obesity

- Reduce burden of chronic diseases caused by obesity.
- Consider health in all local policies.

- Increase percent of adults and children who meet or exceed physical activity guidelines for health.
- Increase area workplaces that have family supportive breastfeeding environments.
- Reduce consumption of sugar sweetened beverages.
- Increase access to healthy foods, focusing on low-income/minority areas.
- Increase the number of traditionally non-health policies that include components to promote health.

Access to Quality Healthcare and Preventive Services

- Everyone has access to quality health services.
- Reduce social and economic barriers.
- Increase the use of data sharing across systems.

- Increase the underserved population that has a medical and dental home
- Increase continuity of care provided to patients
- Increase availability of timely preventive care.
- Increase the number of providers who participate in cultural competency training.
- Increase the social support network.
- Reduce financial barriers to obtaining healthcare
- Increase the availability of secure patient health data to providers.

Maternal, Infant, and Child Health

- Improve the health of mothers, infants, and children before, during, and after pregnancy.

- Reduce infant mortality rates
- Reduce teen pregnancy rates
- Reduce repeat teen pregnancy rates
- Improve postpartum mother and infant health

This plan is based on the results of a community health assessment process.
