2019
County Health Ranking
Summary

Twiggs County

A summary of the strengths and areas of opportunities identified by countyhealthrankings.org.

Report Prepared by:
Amber Erickson, MPH
Director of Epidemiology, Community Assessment, & Research Initiatives

HEALTH FACTORS

Based on weighted scores for health behaviors, clinical care, social and economic factors, and the physical environment. The map is divided into four quartiles with less color intensity indicating better performance in the respective summary rankings.

HEALTH OUTCOMES

Shows the distribution of health outcomes, based on an equal weighting of length and quality of life. The map is divided into four quartiles with less color intensity indicating better performance in the respective summary rankings.

What is the County Health Rankings?

Published by the University of Wisconsin Population Health Institute and the Robert Wood Johnson Foundation, the County Health Rankings rank the health of nearly every county in the nation and illustrate what we know about what is keeping people healthy, making them sick, and what we can do to create healthier communities by using the model to right. The information is compiled for the Rankings by using county-level measures from a variety of national data sources. These measures are standardized and combined using scientifically informed weights and are then rank counties by state, providing two overall ranks:

1. Health outcomes: how healthy a county is now.
2. Health factors: how healthy a county will be in the future.

The information provided by this report explores the size and nature of health differences by place and race/ethnicity in Georgia and how state and community leaders can take action to create environments where all residents have the opportunity to live their healthiest lives (CHR&R, 2018). Specifically, this report will help illuminate:

1. Overview of the Rankings for Counties within the North Central Health District.
2. Snapshot of the areas of strength and areas to explores within each district county.
3. Description of how the county health department and district office are working to close identified gaps.

More information can be found at [countyhealthrankings.org](http://countyhealthrankings.org)

Overview of North Central Health District Rankings

The overall rankings in health outcomes represent how healthy counties are within the state. The healthiest county in the state is ranked #1. Ranks for health outcomes are based on an equal weighting of length and quality of life. Ranks for health factors are based on weighted scores for health behaviors, clinical care, social and economic factors, and the physical environment. Overall health outcomes and health factor ranks have been compared to 2017 ranks. A red number indicates a negative move in rank and a green number indicates a positive move in rank.

Twiggs County Demographics

- 100% Rural
- Less than 1% of the state population.
- 51% Female
The Areas of Strength highlights measures that are assets in your community already. Accounting for the relative influence of each measure on health outcomes, the County Health Rankings team used a variety of techniques to identify the Health Factor measures for your county that are the assets your community might want to build on. They identified measures where there are meaningful differences between your county's values and either your state average, the national benchmark, or the state average in the best state.

- Excessive Drinking
- High School Graduation
- Some College
**Areas of Strength**

### Excessive Drinking

Excessive Drinking measures the percentage of a county’s adult population that reports binge or heavy drinking in the past 30 days.

- **Twiggs County**
  - 12%

- **North Central Health District**
  - 11-16%

- **Georgia**
  - 15%

### High School Graduation

High School Graduation is the percentage of the ninth-grade cohort that graduates from high school in four years.

- **Twiggs County**
  - 90%

- **North Central Health District**
  - 77-95%

- **Georgia**
  - 81%
Some College is the percentage of the population ages 25-44 with some post-secondary education, such as enrollment in vocational/technical schools, junior colleges, or four-year colleges. It includes individuals who pursued education following high school but did not receive a degree as well as those who attained degrees.

Some College

- **Twiggs County**: 52%
- **North Central Health District**: 21-66%
- **Georgia**: 63%
The Areas to Explore highlight measures that are potential challenges your community may want to examine more closely. Accounting for the relative influence of each measure on health outcomes, the County Health Rankings team used a variety of techniques to identify the Health Factor measures for your county that seem to have the greatest potential opportunity for improvement. They identified measures where there are meaningful differences between your county’s values and either your state average, the national benchmark, or the state average in the best state.

- Adult Smoking
- Adult Obesity
- Access to Exercise Opportunities
- Uninsured
- Unemployment
- Children in Poverty
- Income Inequality
- Children in Single-Parent Households
- Injury Deaths
- Long Commute - Driving Alone
Adult Smoking

Adult Smoking is the percentage of the adult population in a county who both report that they currently smoke every day or most days and have smoked at least 100 cigarettes in their lifetime.

- **Twiggs County**: 24%
- **North Central Health District**: 18-24%
- **Georgia**: 18%

Adult Obesity

Adult Obesity is based on responses to the Behavioral Risk Factor Surveillance Survey (BRFSS) and is the percentage of the adult population (age 20 and older) that reports a body mass index (BMI) greater than or equal to 30 kg/m².

- **Twiggs County**: 35%
- **North Central Health District**: 31-36%
- **Georgia**: 30%
Access to Exercise Opportunities measures the percentage of individuals in a county who live reasonably close to a location for physical activity.

Areas to Explore

Unemployment

Unemployment is the percentage of the county's civilian labor force, age 16 and older, that is unemployed but seeking work.

- **Twiggs County**: 7.6%
- **North Central Health District**: 4.3-7.6%
- **Georgia**: 4.7%

Children in Poverty

Children in Poverty is the percentage of people under age 18 living in poverty.

- **Twiggs County**: 44%
- **North Central Health District**: 18-45%
- **Georgia**: 22%
## Income Inequality

Income Inequality is the ratio of household income at the 80th percentile to that at the 20th percentile, i.e., when the incomes of all households in a county are listed from highest to lowest, the 80th percentile is the level of income at which only 20% of households have higher incomes, and the 20th percentile is the level of income at which only 20% of households have lower incomes. A higher inequality ratio indicates greater division between the top and bottom ends of the income spectrum.

Injury Deaths

Injury Deaths is the number of deaths from planned (e.g. homicide or suicide) and unplanned (e.g. motor vehicle deaths) injuries per 100,000 population.

- **Twiggs County**: 99
- **North Central Health District**: 54-99
- **Georgia**: 63

Long Commute - Driving Alone

Long Commute - Driving Alone is the percentage of workers who drive alone (via car, truck, or van) with a commute longer than 30 minutes.

- **Twiggs County**: 55%
- **North Central Health District**: 23-57%
- **Georgia**: 41%
The Twiggs County Health Department (TCHD) and NCHD currently provide health programs and support health improvement policies that provide services that are scientifically supported. Programs currently supported are affordable pricing at clinics that include a sliding pay-scale, health insurance enrollment assistance, partnership with schools and businesses to provide vaccinations to staff and students, provision of coordinated care in the home, text message-based health interventions, partnerships with other community healthcare providers and agencies, and community health workers. Additional examples are free condom distribution programs throughout the community, long-acting reversible contraception access at low cost, and teen pregnancy prevention programs. Programs to prevent injury related deaths are also being implemented by the TCHD and NCHD. These programs include car seat education and distribution campaigns. Tobacco Cessation campaigns using multiple media outlets and tobacco free policies are utilized throughout the district to curb tobacco related health issues.

WIC provides nutritional services to pregnant and nursing women and children under 5 and are currently working with preschools on a project to provide WIC services to families in need through the school system. WIC is also an essential community partner to promote breastfeeding and support to women. A worksite wellness committee also provides programs to staff that promotes obesity and chronic disease prevention. Additionally, training on culturally competent health care and customer service has become a priority and evaluation of programs to ensure the quality and consistency of services and programs is being conducted throughout NCHD.

New initiatives are also being investigated that include telemedicine and additional outreach and prevention interventions that will hopefully assist in decreasing existing health gaps. The TCHD and NCHD are also implementing the Health and Human Services supported public health 3.0 model and are focusing resources on workforce development, partnerships, funding, infrastructure, and utilization of local data metrics to inform program improvement and evaluation (HHS, 2016). The adoption of this model and utilization of the information in this report will assist TCHD and NCHD achieve its mission of “preventing disease, promoting health, and protecting Central Georgia communities against health threats through education, service, advocacy, and collaboration.”

NCHD is dedicated to preventing disease, promoting health, and protecting Central Georgia communities against health threats through education, service, advocacy, and collaboration.
