

# North Central Health District COVID-19 Operational Summary

August 2, 2021

This is an emerging and dynamic situation, therefore our data and recommendations are subject to change. North Central Health District (NCHD) is part of the Georgia Department of Public Health (DPH) and serves individuals residing in 13 Central Georgia counties: Baldwin, Bibb, Crawford, Hancock, Houston, Jasper, Jones, Monroe, Peach, Putnam, Twiggs, Washington, and Wilkinson. This report describes the NCHD operations in response to the COVID-19 pandemic. The purpose of this report is to provide situational awareness to our district partners and community members.

## COVID-19 Vaccination

North Central Health District started administration of COVID-19 vaccine Dec. 23. NCHD continues to provide COVID-19 vaccine at all 13 of its county health departments in Central Georgia.

**Note: Pfizer is the only COVID vaccine currently approved for children aged 12 and older. Our locations do not offer the Pfizer vaccine. Our sites use Moderna or Johnson & Johnson, and can only vaccinate age 18 and older.**

The data shown on this page only reflects vaccination activities of the 13 NCHD sites, not all providers within our 13-county area. The information in this portion of the report is accurate as of 8/1/2021 at 4 PM.

Vaccine	Doses Administered
Moderna	88341
- Second Doses	42681
Johnson & Johnson	3920
Total Doses	92261

Location	% Vaccinated	% at least 1 Dose
Baldwin	34%	37%
Bibb	34%	39%
Crawford	29%	32%
Hancock	38%	42%
Houston	33%	37%
Jasper	26%	29%
Jones	32%	36%
Monroe	35%	38%
Peach	34%	38%
Putnam	34%	37%
Twiggs	39%	45%
Washington	33%	36%
Wilkinson	39%	44%
District	34%	37%

  - [CDC COVID-19 Data Tracker - Vaccinations in the United States](#)
  - [Vaccines.gov- Find COVID-19 Vaccine Sites](#)

# NCHD Specimen Points of Collection (SPOC)

On March 18, 2020, NCHD stood up our first SPOC in Houston County, and eventually testing was offered at all 13 locations. With the decline in demand for testing, and the widespread availability of testing, NCHD testing operations were scaled down on March 29, 2021 to 3 health departments: Baldwin, Hancock and Houston. *Note: Houston County SPOC is managed by a 3rd party contract laboratory that is coordinated by the state Department of Public Health. The information from this specimen collection will not be included in this report.*

The data shown on this page only reflects specimens collected from NCHD public health points of collection and not representative of all specimens collected within our 13-county area. The information in this portion of the report is accurate as of 8/1/2021 at 4 PM.

## COVID-19 Case Data Resources

The following links provide a variety of regularly updated state- and county-level details regarding COVID-19 cases including demographic data (age, race, gender, etc.), deaths, hospitalizations and more:

- [Georgia DPH COVID-19 Daily Status Report](#)
- [Georgia Geospatial Information Office COVID-19 Status Dashboard](#)
- [CDC COVID-19 Case Data by State](#)

## Epidemiology - Data Definitions

The information in the rest of the report is a breakdown by Presumptive and Confirmed Cases by each county within NCHD. Due to the reporting, interview, and data analysis processes, there may be delays in reporting cases as an outbreak. The Epidemiology Program is working closely with all partners to ensure data accuracy.

**An outbreak is considered closed** if it has been 2 incubation periods since the last symptom onset date.

Not all cases within an outbreak are counted within the county the outbreak occurs (i.e. staff of a facility may live in another county).

**14-Day incidence rate** indicates newly reported confirmed COVID-19 cases among county residents per 100,000 residents during the 14- day period indicated, using 2019 U.S. Census data to derive county population. Rates cannot be accurately calculated for Counties with <5 cases.

**Transmission Levels** are based on the incidence rate and defined as:

- Substantial Spread: greater than 101 cases per 100,000 county residents
- Moderate Spread: 51-100 cases per 100,000 county residents
- Minimal Spread: >11-50 cases per 100,000 county residents
- Low Spread: > 0-10 cases per 100,000 county residents
- Insufficient Data: A rate is not calculated for less than 5 cases reported. These counties may likely have low levels of transmission but may be affected by other factors such as levels of COVID-19 testing.

**CURRENT  
2 WEEK PERIOD:**

7/12/2021 - 7/25/2021

**PREVIOUS  
2 WEEK PERIOD:**

6/28/2021 - 7/11/2021

**PREVIOUS  
7 DAYS:**

7/26/2021 - 8/1/2021

# Epidemiology - Overview

NCHD Epidemiology only reports Confirmed\* and Presumptive\* cases that reside within the 13 counties that make up the district. Although serology (i.e. antibody tests) are reportable, they do not meet the CDC case definition for a confirmed or presumptive case, therefore number of serology tests are not included in this report. Any reductions in numbers are a result of data error corrections (i.e. duplication, incorrect case classification, residency, etc). Data corrections are made as soon as they are found and data accuracy is checked daily by NCHD epidemiology staff. The information in this portion of the report is accurate as of 8/1/2021 at 4 PM.

SUBSTANTIAL  
SPREAD

242

Current 14-Day  
Incidence Rate

Total Number of Confirmed and Presumptive Cases	54,577
Median Age (Age Range)	41 (0-107 Years)
Hospitalizations	4848 (8.88%)
Deaths	1459 (2.67%)
Deaths Median Age (Age Range)	74 (17-102 Years)
Deaths that were Hospitalized	1014 (69.5%)

The incidence rate of COVID-19 for NCHD residents for the **Current 2-Week Period was 242 per 100,000 population (n=1294; population=530,945)**. The previous 2-week period Incidence Rate was 71 per 100,000 population (n=377).

## COVID-19 Breakthrough Cases

The following data describes breakthrough cases of COVID-19 in fully-vaccinated and partially-vaccinated individuals in NCHD's 13-county district. The report includes any confirmed or antigen positive cases with a specimen collection date for a PCR or antigen positive result greater than between 1/1/2021 and 8/16/2021. Cases that meet these parameters will be assigned one of 3 groups for vaccine status at the time of infection: Unknown, Partially Vaccinated, Fully Vaccinated.

Vaccine Status	Positive Cases	Percentage of Cases
Unknown	25796	95%
Partial	461	2%
Full	865	3%

- Unknown: PUIs in this group have no matching vaccine data that correspond to their positive date OR they have vaccine data from after their positive result. The vast majority are most likely unvaccinated at the time of their positive and we report them as unvaccinated in our reports.
- Partially Vaccinated: PUIs in this group had some vaccine prior to their positive date, but do not meet the CDC definition for fully vaccinated. They could have received 1 of 2 doses prior to positive, received 1 of 1 or 2 of 2 but the last vaccine was less than 14 days prior to positive, or they could have had another positive test less than 90 days prior to their post-vaccine positive.
- Fully Vaccinated: PUIs in this group meet the CDC definition for a fully vaccinated breakthrough case. They received 1 of 1 or 2 of 2 vaccine doses at least 14 days prior to their positive date and did not have another positive date in the 90 days prior to the new positive.

# North Central Health District COVID-19 Operational Summary

August 30, 2021

This is an emerging and dynamic situation, therefore our data and recommendations are subject to change. North Central Health District (NCHD) is part of the Georgia Department of Public Health (DPH) and serves individuals residing in 13 Central Georgia counties: Baldwin, Bibb, Crawford, Hancock, Houston, Jasper, Jones, Monroe, Peach, Putnam, Twiggs, Washington, and Wilkinson. This report describes the NCHD operations in response to the COVID-19 pandemic. The purpose of this report is to provide situational awareness to our district partners and community members.

## COVID-19 Vaccination

North Central Health District started administration of COVID-19 vaccine Dec. 23. NCHD continues to provide COVID-19 vaccine at all 13 of its county health departments in Central Georgia. The information in this portion of the report is accurate as of 8/29/2021 at 4 PM.

### Vaccination Status by County

Vaccine Brand	Doses
Johnson & Johnson Total	4050
Moderna Total	90567
• 2nd dose Moderna	43303
• additional dose	116
Pfizer Total	483
• 2nd dose Pfizer	63
• additional dose	9
Total Doses Administered	95100

## Epidemiology - Overview

NCHD Epidemiology only reports Confirmed\* and Presumptive\* cases that reside within the 13 counties that make up the district. Although serology (i.e. antibody tests) are reportable, they do not meet the CDC case definition for a confirmed or presumptive case, therefore number of serology tests are not included in this report. Any reductions in numbers are a result of data error corrections (i.e. duplication, incorrect case classification, residency, etc). Data corrections are made as soon as they are found and data accuracy is checked daily by NCHD epidemiology staff. The information in this portion of the report is accurate as of 8/29/2021 at 4 PM.

**SUBSTANTIAL  
SPREAD**

Total Number of Confirmed and Presumptive Cases	68,567
Median Age (Age Range)	38 (0-107 Years)
Hospitalizations	5285 (7.71%)
Deaths	1538 (2.24%)
Deaths Median Age (Age Range)	74 (17-102 Years)
Deaths that were Hospitalized	1041 (67.69%)

**1333**  
**Current 14-Day  
Incidence Rate**

The incidence rate of COVID-19 for NCHD residents for the **Current 2-Week Period was 1333 per 100,000 population (n=7123; population=530,945)**. The previous 2-week period Incidence Rate was 798 per 100,000 population (n=4264).

### Age Distribution of Cases

All data is based on patient county of residence when known. \*Confirmed Cases are those tested using a Molecular Tests (i.e. PCR) since 3/1/2020. \*Presumptive Cases are those tested using an Antigen Test since 3/1/2020

## COVID-19 Breakthrough Cases

The following data describes breakthrough cases of COVID-19 in fully-vaccinated and partially-vaccinated individuals in NCHD's 13-county district. The report includes any confirmed or antigen positive cases with a specimen collection date for a PCR or antigen positive result greater than between 1/1/2021 and 8/16/2021. Cases that meet these parameters will be assigned one of 3 groups for vaccine status at the time of infection: Unknown, Partially Vaccinated, Fully Vaccinated.

The following is based on the 33,145 cases reported between 1/1/2021 - 8/30/2021.

Vaccination Status	Positive Cases	% Of Cases
Unknown	30,997	94%
Partial	704	2%
Full	1444	4%

Breakthrough Cases by County		
County	# of Cases	% of Cases
TWIGGS	14	1.03%
HANCOCK	18	1.02%
CRAWFORD	20	1.41%
WILKINSON	26	1.77%
JASPER	30	2.03%
WASHINGTON	34	2.18%
MONROE	54	3.95%
PUTNAM	62	3.91%
PEACH	66	4.58%
JONES	77	5.29%
BALDWIN	123	8.51%
BIBB	434	30.08%
HOUSTON	486	34.23%
Total	1444	100.00%

NCHD Breakthrough Cases by Month		
Month	# of Cases	% of Cases
Jan	1	0.06%
Feb	8	0.41%
Mar	6	0.37%
Apr	29	1.72%
May	21	1.41%
Jun	28	1.87%
Jul	320	21.40%
Aug	1031	72.76%
Total	1444	100.00%

Fully-Vaccinated Residents	200,000
Fully-Vaccinated Hospitalizations	67
Fully Vaccinated Deaths	14
Unvaccinated Hospitalizations	5,281
Unvaccinated Deaths	1,585

- Unknown: PUIs in this group have no matching vaccine data that correspond to their positive date OR they have vaccine data from after their positive result. The vast majority are most likely unvaccinated at the time of their positive and we report them as unvaccinated in our reports.
- Partially Vaccinated: PUIs in this group had some vaccine prior to their positive date, but do not meet the CDC definition for fully vaccinated. They could have received 1 of 2 doses prior to positive, received 1 of 1 or 2 of 2 but the last vaccine was less than 14 days prior to positive, or they could have had another positive test less than 90 days prior to their post-vaccine positive.
- Fully Vaccinated: PUIs in this group meet the CDC definition for a fully vaccinated breakthrough case. They received 1 of 1 or 2 of 2 vaccine doses at least 14 days prior to their positive date and did not have another positive date in the 90 days prior to the new positive.
