Macon-Bibb County Health Department

Located at 1600 Forsyth Street in Macon, Georgia, this county health department offers more than thirty (30) different programs and services, all focused on protecting the individuals and families within our community in the areas of oral health, maternal health, communicable disease prevention, environmental health, and children's health. We work daily to protect the health of our county's residents, visitors, and workers wherever they live, work, or play. Many services we provide are available at no charge, and all services we provide are low-cost. No one is denied service because of inability to pay or lack of insurance in our practice.

Macon-Bibb County Health Department is recognized by the Office of Disease Prevention and Health Promotion (ODPHP) within the U.S. Department of Health and Human Services (HHS) as a Healthy People 2030 Champion. As a Healthy People 2030 Champion, MBCHD has demonstrated a commitment to helping achieve the Healthy People 2030 vision of a society in which all people can achieve their full potential for health and well-being across the lifespan.

Three Year Summary FY22 - FY24

Message From

Jimmie H. Smith, Jr., MD, MPH
 Administrator, Macon-Bibb
 County Health Department

The Macon-Bibb County Health Department plays a vital role in guiding the public health practices, policies, and interventions that seek to promote the health and well-being of all who live, work, and visit our community. We partner and collaborate with others across the county, region, and state in hopes of attaining the full potential for health and well-being of our population that is full of opportunities and challenges.

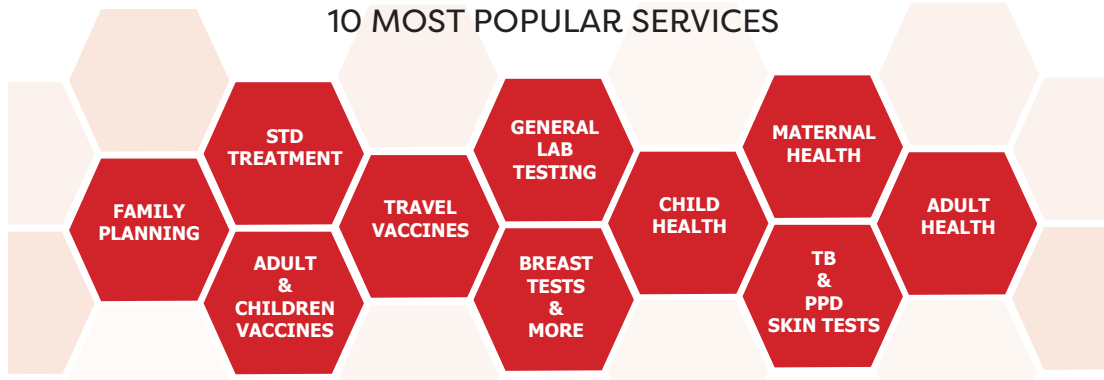

Operating under the vision of the Georgia Department of Public Health, whose mission is “to prevent disease, injury and disability, promote health and well-being, and prepare for and respond to disasters”, we, have extended our efforts to include the following: 1) ABCs-our team members will be accessible, believable, and competent in every aspect of their work; 2) we will not underestimate, undervalue, or undermine any client, colleague, or patient that presents for assistance, for the social determinants of health are real; and 3) we will be the model of positive public health practice for the state of Georgia.

Though our collaborative and innovative efforts have been recognized well beyond the state of Georgia, the opportunity remains for us to pursue the “golden opportunities carefully disguised as irresolvable problems”. We will continue to serve and strive for organizational excellence.

CLINICAL SERVICES

10 MOST POPULAR SERVICES

IMMUNIZATIONS HAVE BEEN THE HEALTH DEPARTMENT'S MOST WIDELY USED SERVICE.

TRAVEL VACCINES HAVE INCREASED **966%** SINCE FY22 AS COVID-RELATED TRAVEL RESTRICTIONS EASE.
